COMMUNITY BENEFIT

Sam Mayes

Community Relations Coordinator, RES

LOCAL ELECTRICITY DISCOUNT SCHEME (LEDS)

- LEDS has been developed in response to feedback from local communities
- Offers residential, community and business properties closest to RES' Jacks' Lane Wind Farm an annual discount of £117 off their electricity bills
- Discounts paid directly to the electricity supplier will commence once the wind farm is operational
- No requirement to change electricity supplier or tariff

LEDS QUALIFYING AREA

The Qualifying Area for each RES LEDS scheme is calculated by taking a straight line distance - the Set Distance - from each wind turbine and identifying all the postcode geographic boundaries (as defined by Ordnance Survey) with properties located within this Set Distance.

The Set Distance is chosen so that the number of properties that fall within the Qualifying Area will receive a discount of at least £100 per year.

LEDS CONTACT DETAILS

FAQS and further information on how to apply can be found at:

www.res-leds.com

FREEPHONE: **0800 011 3341**

E-MAIL: leds@res-ltd.com

COMMUNITY BENEFIT FUND

The Jack's Lane Wind Farm Community Benefit Fund will support local groups and initiatives in the wider community.

It will become available once the wind farm is fully operational.

£30,000 per year (index linked) will be paid annually for the 25 year lifetime of the project.

Norfolk Community Foundation (NCF)

Remit:

- receive the annual Fund payments
- work with the Fund Panel to finalise fund criteria
- handle enquiries from applicants
- process grant offers and payments in line with Fund Panel decisions
- deliver annual reports to RES

FUND PANEL

The Fund Panel is the decision-making body. It is made up of representatives of the community within the Area of Benefit and meets at an agreed frequency to assess applications and make decisions about how the Fund is distributed.

The NCF will work with the CLG to gain nominations for suitable representatives to sit on the Fund Panel.

Meetings of the Fund Panel are distinct and separate from CLG meetings, although progress on the formation of the Panel and allocation of the Fund will be reported to the CLG.

PROPOSED AREA OF BENEFIT

To make sure that the Fund is invested locally, RES specifies an **Area of Benefit** to the Fund Administrator and Fund Panel.

Preference will be given to applications from groups or for projects benefiting those who live and work within 7km of Jack's Lane Wind Farm, and the parish boundaries of:

Bagthorpe with Barmer, Barwick, Bircham, Burnham Market, Burnham Thorpe, Docking, East Rudham, Houghton, North Creake, South Creake, Stanhoe, Syderstone and Tatterset.

COMMUNITY BENEFIT EXAMPLES

Community benefits at RES sites across the UK cover a whole range of initiatives.

Some examples include:

- the creation of a new community riverside pathway and footbridge
- entertainment activities for family fun days
- summer schemes for local children
- maintenance and running of community buildings
